DETAILED ACTION

Claims 4, 11-22, 25, 27 are cancelled. Claims 1-3, 5-10, 23-24, 26, 28-30 are pending.

Allowable Subject Matter

Claims 1, 7 and 23 are allowed. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed since there is no prior teaches a transmission-reflection type liquid crystal display device comprising a reflecting film on an inner side of tile first transparent substrate adjacent to the liquid crystal layer, the reflecting film functioning as a pixel electrode and defining a light-transmitting region, wherein said light transmitting region is disposed between an inner edge of a gate line and a side of an outer edge periphery of said reflecting film and between an inner edge of a data line and a side of an outer edge periphery of said reflecting film in each pixel, a first opposing side of said reflecting film overlapping more than half the width of an adjacent gate line, and a second opposing side of said reflecting film overlapping more than half the width of an adjacent data line.

Claims 2-3, 5-6 and 28 are allowed since they depend on the allowed claim 1.

Claim 7 is allowed since there is no prior teaches a transmission-reflection type liquid crystal display device comprising a reflecting film functioning as a pixel electrode formed in each pixel and connected to a third terminal of the transistor in each pixel, a first outer edge at a side of said reflecting film overlapping \approx more than half the width of

Art Unit: 2871

one of said gate lines, while an outer edge at an opposing side of said reflecting film does not overlap an inner edge of an adjacent gate line, and a second outer edge of said reflecting film overlapping more than half the width of an adjacent one of said data lines and wherein a light-transmitting region through which light may pass is disposed between said one of said gate lines and said outer edge of said reflecting film which does not overlap an inner edge of said adjacent gate line and between an inner edge of a data line and a side of an outer edge periphery of said reflecting film in each pixel.

Claims 8-10 and 29 are allowed since they depend on the allowed claim 7.

Claim 23 is allowed since there is no prior art teaches a transmission-reflection type liquid crystal display device comprising a reflecting film functioning as a pixel electrode on the pixel regions; wherein an outer peripheral edge of a side of the reflecting film is apart from one of the gate lines and one of the data lines to define a light-transmitting region between said one of the gate lines and one of the data lines and a reflecting region on the reflecting film, while an outer peripheral edge of a first opposing side of said reflecting film overlaps more than half the width of the gate line in one pixel, and an outer peripheral edge of a second opposing side of said reflecting film overlaps more than half the width of the data line in the one pixel.

Claims 24, 26, 28-30 are allowed since they depend on the allowed claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2871

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
